EXPERIENCE

Dialogue (dialogue.co)

Software Developer - Platform

Jan 2026 - Present

SSENSE (ssense.com)

Software Developer (L3)

June 2022 - Jan 2026

- Delivered core features across retail, e-commerce, and marketplace platforms, including a new point-of-sale system, OMS migration to Kibo API, and the launch of SSENSE Marketplace
- Designed and maintained scalable microservices with AWS Serverless (Lambda, EKS, SQS, SNS, DynamoDB) to support event-driven architectures
- Built ETL pipelines with AWS Glue and integrated services into a company-wide data mesh to improve cross-team data accessibility
- Developed RESTful APIs and internal tools, using Vue.js/TypeScript for the customer-facing site and React for internal applications
- Applied CI/CD best practices with Jenkins, Docker, and Kubernetes; contributed to architectural design and technical documentation
- Ensured code quality through unit and integration testing with Jest, while driving adoption of coding standards across the team
- Tech: AWS (Lambda, EKS, DynamoDB, SQS, SNS, Glue), Node.js, Python, TypeScript, Vue.js, React, Docker, Kubernetes, Jenkins, Jest

Piriko Inc.

Software Engineer

August 2021 - April 2022

- Built and maintained cross-platform mobile app features (Ionic, Node.js, Next.js, PostgreSQL)
- Enhanced backend REST APIs with authentication, third-party integrations, and user-generated content support
- Designed a Flask microservice using KNN for personalized in-app recommendations
- Delivered a custom push notification system and improved app reliability through debugging and unit testing
- Coordinated a small dev team via daily stand-ups and sprint planning
- Tech: Ionic, Node.js, Python/Flask, DynamoDB, PostgreSQL, Docker, Scikit-learn, Pandas, Next.js

AI / Hub (theaihub.ca)

Research Associate

November 2018 - August 2021

- Built web, mobile, and data-driven solutions for clients across healthcare, manufacturing, real estate, and training
- Health Espresso: Developed Flutter UI components and API integrations to capture and process patient wound images
- St. Mary's Cement: Created Python-based data collection tools and dashboards (Streamlit, fbProphet) for energy usage forecasting
- 3D CityScapes: Automated large-scale real estate data collection and exposed results via a RESTful Flask API
- Safety By The Book: Delivered an online job safety training portal using C#, Entity Framework, and SQL Server
- Tech: Python, SQL, Flask, Flutter/Dart, Selenium, Streamlit, C#, JavaScript, AWS

EDUCATION

Ontario Tech University

Bachelor of Science in Computer Science (Honours)

GPA: 3.7

May 2021

Durham College

Computer Programmer Analyst Advanced Diploma

May 2019

Movie Reviews NLP (Capstone Project), Python, Django, Bootstrap, PostgreSQL, SQL, HTML, CSS, JavaScript

- Developed front end and backend components for the full-stack web application
- Performed NLP sentiment analysis on movie reviews from Rotten Tomatoes to provide an overall score for a positive/negative review

Peer Tutoring - Worked with Students to help them understand programming concepts in C++, C#, and JavaScript and complete assignments

SKILLS

TypeScript, Python, Node.js, React, REST APIs, MongoDB, PostgreSQL, Docker, Kubernetes, CI/CD, Microservices, Event-Driven Architecture, Unit Tests, Functional Tests, Domain-Driven-Design, System Design, AWS, SNS/SQS, EKS, Lambda, S3, Glue, Monitoring/Logging, JWT, Caching/Redis
